

Mount Beauty & District Men's Shed ✂

2024 Presidents Report

This year has been another great year of expanding our expertise.

The building of the CNC machine has enabled a new direction of projected shed output, which may help our future income.

The metalwork area has continued to be an expanding project, and plenty of work has been carried out.

We must have projects that enable all our members to feel that they are an essential and integral part of our shed. It is also imperative that we keep our own perceived importance capped so that other members enjoy being part of the group.

We have welcomed some new members and their projects to keep us in touch with the realities of the shed's aims in being available to all groups.

The group has had ongoing medical issues, but members have met these challenges as we should.

Shed overcrowding has become an issue, and at the last committee meeting, it was discussed, and maybe a solution arose with the possibility of another building that may alleviate our storage issues and provide storage for other parties.

Once again, I am proud to be a member of the shed because of the respect and concern we show each other at all times.

They said always follow your dreams.
